N-JET AIRCRAFT MANAGEMENT SERVICES

SCOPE

N-Jet is an ARGUS Platinum/ISBAO registered aviation management company providing aircraft management and flight department services to aircraft owners and operators for over 30 years.

As an N-Jet managed aircraft owner-operator, choose the N-Jet services that work best for you. Use N-Jet as your full service flight department or tailor N-Jet's services to supplement your existing flight department needs.

N-Jet aviation services include all facets of aircraft management and operation. N-Jet has the experience, expertise and capabilities to support your aircraft and flight operations anywhere in the world. N-Jet services include aircraft acquisition, domestic and international flight support, worldwide operating authority, safety management, aircraft and passenger security, in-flight emergency medical services, substitute aircraft and additional lift, environmental and emission compliance, contract fuel services, fleet hull and liability insurance, flight crew services, flight crew training, maintenance and maintenance support, aircraft documentation and manuals, tax exemptions, revenue opportunities and more.

AIRCRAFT ACQUISITION

Because of the myriad of regulations and tax considerations associated with the acquisition and operation of a sophisticated aircraft, it is critical to involve specialized aviation professionals early in the acquisition process. As an N-Jet managed aircraft owner-operator, N-Jet can provide a team of professionals or assist your team of professionals in identifying and acquiring an aircraft that meets your needs while satisfying the regulatory and operational requirements associated with your mission plans.

DOMESTIC AND INTERNATIONAL FLIGHT SUPPORT

As domestic and international operations of turbojet aircraft become increasingly complicated, an N-Jet managed aircraft owner-operator has instant 24/7 access to N-Jet's flight operations center for all flight support services. Services include flight permitting, customs and immigration authority, emission compliance, specialized crew qualifications and vetting, flight handling, specialized flight planning, security services and much more.

WORLDWIDE AUTHORIZATION

As an N-Jet managed aircraft owner-operator, your aircraft will be authorized to operate throughout the world and in any sovereign State including flight over all the oceans of the world and the special airspace of the North Atlantic, the Central and Eastern Pacific, the Western Atlantic airspace, Northern Pacific, and Canadian MNPS airspace.

ARG/US PLATINUM RATED

As an N-Jet managed aircraft owner-operator, your aircraft becomes part of the N-Jet safety culture with an ARG/US Platinum operating rating.

ARG/US is the leader in aviation auditing worldwide. Platinum is the highest rating issued by ARG/US. To achieve an ARG/US Platinum rating, N-Jet undergoes periodic in depth safety audits as well as reviews of all aspects of the N-Jet operations and management processes and procedures.

SAFETY MANAGEMENT (SMS)

Effective November 2010 all international commercial, private and business flights will be required to operate under an approved and audited Safety Management System (SMS). The domestic U.S. will follow with similar requirements (est. 2012).

N-Jet's Safety Management System (SMS) has been audited, approved and registered with the International Business Aircraft Association (IBAC) in accordance with the International Standard for Business Aircraft Operations (IS-BAO). IS-BAO registered companies such as N-Jet meet ISO-9000 like standards for aircraft management and operations.

As an N-Jet managed aircraft owner-operator, your aircraft becomes part of the N-Jet safety culture. Your flights become IS-BAO SMS approved along with the ARG/US Platinum operating rating.

Before any N-Jet managed aircraft owner-operator flight is released, it must pass a rigorous triple safety evaluation using N-Jet's proprietary SMS processes. A constellation of proprietary software applications evaluate and rate hundreds of safety-of-flight factors allowing N-Jet operations to instantly and contemporaneously identify and mitigate factors that affect flight safety.

AIRCRAFT AND PASSENGER SECURITY

As an N-Jet managed aircraft owner-operator, your aircraft becomes part of the N-Jet TSA approved Twelve Five Standard Security Program (TFSSP). N-Jet monitors security threat levels worldwide. All crew members are trained to identify and handle threats either to the aircraft or to the passengers.

In addition, N-Jet crewmembers sign sworn statements to maintain strict confidentiality concerning aircraft owner-operator and passenger information including but not limited to conversations, travel plans, and activities.

IN-FLIGHT EMERGENCY MEDICAL SERVICES

As an N-Jet managed aircraft owner-operator, you can receive 24-hour medical assistance before, during, and after your flight. Whether a medical emergency occurs in the air or on the ground, you receive real-time assistance in managing the situation from board-certified emergency physicians. These physicians manage thousands of emergencies every year and understand the unique constraints associated with the aircraft environment.

N-Jet provides crewmember online medical assistance training or training directly from professional trainers who come to your site or provide training at SimuFlite or select Flight Safety locations.

N-Jet offers a complete solution for equipping and conveniently locating AEDs onboard your aircraft and training crewmembers on defibrillator use.

N-Jet managed aircraft owner-operators have online access to comprehensive destination information on more than 200 countries worldwide. Access country guides, alerts, situation updates, country risk ratings, weekly security forecasts and more.

SUBSTITUTE AIRCRAFT AND ADDITIONAL LIFT

As an N-Jet managed aircraft owner-operator, access our fleet of charter and managed aircraft for a substitute aircraft or additional lift. In addition, N-Jet's global network can provide you with any kind of aircraft anywhere in the world in a moment's notice. All at low rates provided exclusively for the N-Jet family of aircraft owner-operators.

ENVIRONMENTAL AND EMISSION COMPLIANCE

As the Cap and Trade, ETS, and other carbon emission laws as enacted or begin to take effect, N-Jet managed aircraft owner-operators will be covered under N-Jet's blanket carbon credit trading agreements.

CONTRACT FUEL

As an N-Jet managed aircraft owner-operator, access N-Jet's volume fuel discount buying power through our numerous fuel contract agreements.

FLEET INSURANCE

As an N-Jet managed aircraft owner-operator, access N-Jet's insurance buying power to take advantage of fleet hull rates with liability limits of up to \$500,000,000 from AAA+ rated insurance underwriters.

FLIGHT CREW SERVICES

As an N-Jet managed aircraft owner-operator, select from N-Jet's pool of qualified, experienced, and trained crew members. Alternatively, N-Jet can assign your own personally selected flight crew members, or assist you in hiring your own full time flight crew. Choose the option or combination of options that works best for you.

FLIGHT CREW TRAINING

As an N-Jet managed aircraft owner-operator, access our simulator based state of the art flight training programs at training centers around the U.S. (i.e. Simuflite and Flight Safety). In addition to bi-annual recurrent aircraft and procedures training, N-Jet flight and managed aircraft owner-operator flight crews also receive specialized international, mountain operations, emergency procedures, in-flight medical emergency and much more.

MAINTENANCE AND SUPPORT

As an N-Jet managed aircraft owner-operator, N-Jet monitors and tracks your aircraft maintenance requirements and consults with you on the best options for performing required maintenance and inspections.

N-Jet's maintenance department is an FAA certified repair station (UPWR481X). Whether for heavy checks, avionics repair, wheels and brakes, or routine maintenance, N-Jet has the services for your aircraft.

For maintenance away from home base and for aircraft based remotely, N-Jet has affiliations with maintenance centers and repair stations worldwide.

AIRCRAFT DOCUMENTATION AND MANUALS

As an N-Jet managed aircraft owner-operator, N-Jet provides all of your aircraft MEL, CDL, AAIP, licensing, registration and other aircraft documentation needs.

TAX CONSIDERATIONS

It is important to involve aviation tax professionals early in the aircraft acquisition process. As an N-Jet managed aircraft owner-operator, N-Jet can refer you to aviation tax professionals that will assist you in taking advantage of sales tax exemptions, accelerated depreciation opportunities, and advise you on the pleasure vs. business tax considerations of aircraft ownership.

REVENUE OPPORTUNITIES

As an N-Jet managed aircraft owner-operator, you may desire to use your aircraft to generate revenue to help offset some ownership expenses. N-Jet maintains a commercial air charter certificate (NTFA986G) for this purpose. Use of the aircraft in commercial service is completely at the option of the managed aircraft owner-operator.
